Welcome to the First Day of a Transformed Life

There are times when you alter your routine in a way that can transform your life. As you look to improve yourself and enhance your well-being, you search for ways to clear your mind, make your body healthier and more agile. You look for contentment both within yourself and your surroundings. It's a search for experiences that allows you to say "Yes, that changed my life."

At Caldera® Spas, we design and build hot tubs for just that sort of life-altering experience. To those who think of a hot tub merely as a luxury, that could come as a surprise. Yet our purpose is to improve your life, to help you feel better

physically, mentally and even spiritually. A Caldera Spas hot tub is a personal wellness retreat that can help you feel more relaxed, flexible and focused. It can relieve the pressure on joints, reduce pain and help you unwind. It can also provide a customized massage to help muscles recover.

We invite you to include Caldera Spas in your journey and learn more about how warm water therapy and massage can truly change your life in just 20 minutes a day. It's a small investment of time that can yield dramatic results in your personal wellness journey.

Caldera® Spas: An Essential Part of a Holistic Approach to Your Well-being

Wellness is not a final destination but a path to be wandered and enjoyed. No single component of the journey is a solution in and of itself. Instead, the path is winding and continuous with a variety of experiences that contribute to your overall health. We believe that using your hot tub regularly is a vital component in a holistic blend of life-shaping activities.

Movement

Fitness experts agree that regular exercise can help control weight, improve mood, and boost energy. As a general goal, they suggest you aim for at least 30 minutes of physical activity every day, even if that translates to just three 10-minute walks. Do your best to make it an enjoyable part of your daily routine.

A Sense of Purpose

Having a sense of purpose helps you stay healthy, improves your relationships and helps you live longer. Having purpose lowers risk of mortality more than any other factors known to predict longevity.

Nutrition

Good nutrition can reduce the risk of certain medical conditions, increase your energy, delay the effects of aging and strengthen your immune system. Invest time to learn what your body needs, and make healthy eating fun with great, delicious cooking. Resources abound!

Connections

Connections to family and friends are essential to long-term wellness and they influence health as much as diet and fitness. Studies show that people with satisfying social connections are happier, healthier and live longer.

Time to Relax and Recharge

Stress is a contributing factor in countless medical conditions. Taking the time to relax can reduce the effects of stress. Medical experts agree that it may even lead to benefits like lower blood pressure and reduces the likelihood of depression.

Immersion and Massage

About 20 minutes a day in your hot tub can relax muscles, relieve pressure on joints, and increase circulation. Warm water immersion also provides similar benefits to the nervous system as meditation. You emerge from a daily soak feeling fully relaxed, rejuvenated and transformed.

Self-reflection, Mindfulness

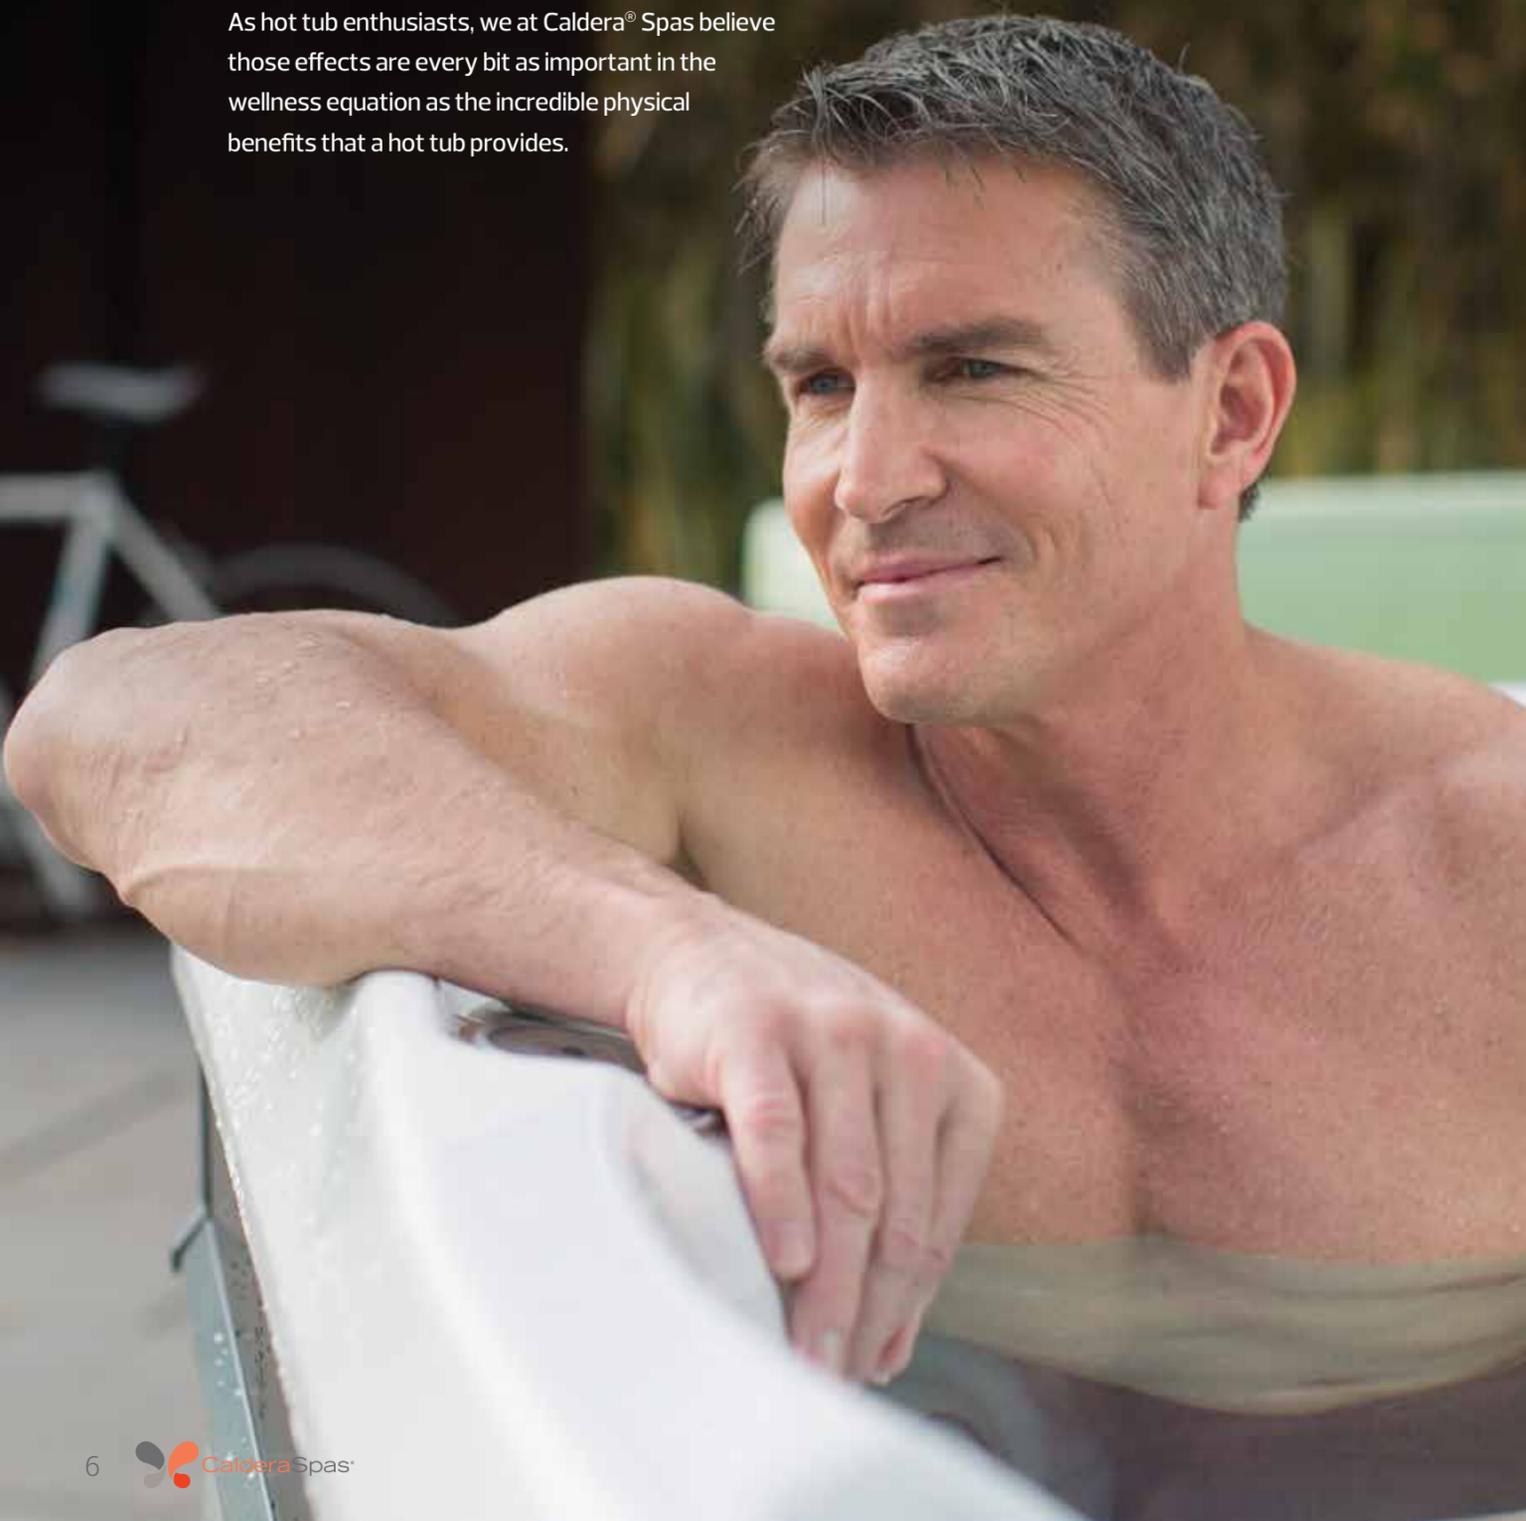

Whatever form of self-reflection or mental relaxation you use to unwind is likely to help you reduce stress, improve cognitive functions and help you maintain a sense of control, balance, and renewal.

Transforming Mind, Body, Spirit

There are substantial benefits associated with warm water immersion, and we frequently hear about many of them from other hot tub users. The 20-minute experience can change your outlook each day, giving you time to reflect, deeply relax, calm your thoughts and recharge. It provides a reset button you can push each day, one that allows you to transform body, mind and spirit.

As hot tub enthusiasts, we at Caldera® Spas believe those effects are every bit as important in the wellness equation as the incredible physical benefits that a hot tub provides.

Why 20 Minutes Matters to You

The transformative effects of warm water have been used for centuries. With our focus on enhancing the self-care benefits of a spa through careful design and engineering, a Caldera® Spas hot tub can accomplish more than ever before.

Promotes muscle recovery and healing

A spa's warm water massage promotes healing by increasing circulation, carrying nutrients to help cells and tissue regenerate. According to the textbook *Comprehensive Aquatic Therapy* by industry experts Dr. Bruce Becker and Dr. Andrew Cole, immersion in warm water is a "unique healing environment" that can lead to temporary relief from muscle aches and pains.

Decreases stress

The negative effects of stress are well documented. Time in a hot tub allows you to clear your mind, relax deeply and start each day with a fresh, positive outlook.

Relieves joint pain

Time in a hot tub creates a helpful environment for relieving joint pain and stiffness. While the water's buoyancy reduces stress on joints and muscles, warm water massage increases circulation, relaxes muscles, ligaments and tendons, and stimulates the release of endorphins, the body's natural pain reliever.

Improves circulation

In a spa, body temperature increases and blood vessels dilate, improving circulation to carry in nutrients and oxygen. Pores open and release moisture as a cell-cleansing mechanism.

Builds relationships

Time in a hot tub can foster heartfelt communication between you and friends or family members without distractions.

CALDERA WELLNESS

A quick 20-30 minute nap during the day can help improve learning, memory and creative thinking. Harvard researchers say that a nap can help make you a more effective problem solver and can help you separate important information from less relevant information. But more than 20-30 minutes can make you feel groggy. Don't use napping as an alternative to less nighttime sleep. A good night's sleep in conjunction with the occasional nap yields the best results.

Sleep Better

Sleep Deeper

Lack of sleep can have a profound effect on your health, yet roughly 60 million Americans suffer sleep disorders during the year. A hot tub can help relax you and prepare your body for sleep. But that's not all.

Sleep is normally preceded by a drop in body temperature. As you soak in your hot tub, your body temperature increases. After you leave the hot tub, the body temperature you gained begins to normalize and decrease. That more dramatic drop in core temperature signals to your brain that it's time to sleep.

You can enhance that mechanism by keeping your bedroom cool. The National Sleep Foundation suggests keeping your room between 60 and 67 degrees F, while keeping your room free of noise and other distractions.

We Create Spas with a Focus on Comfort, Design and Performance

Our reliable, high-performance spas are designed for comfort, efficient energy use, and simple maintenance so you can focus on enjoying your hot tub often. Every feature—from the efficiency of a heater to the glow of an LED light to the versatile jet options—is crafted with that in mind.

The Caldera difference is in the details. We believe that once you've experienced the Pure Comfort®, design, and performance of your Caldera spa, you'll want to make it part of your everyday well-being routine.

Comfort

Comfort is the essential element in our hot tubs. Deep, cradling seats and a textured Foot Ridge® help you stay relaxed and seated even when enjoying powerful jets. Perfectly positioned hydrotherapy massage melts your tension away. And a whisper-quiet sound dampening design enhances the comfort experience.

Design

We craft each hot tub detail to awaken the senses. From rich colors and contemporary cabinet styles to the organic contours of our sculpted seats, every element is intended to soothe and delight.

Performance

To get the most out of your spa, it needs to operate at a consistently high level. Each Caldera hot tub is engineered and built with the strictest attention to quality and efficiency. Our commitment is your assurance of reliable, energy-efficient performance for years of worry-free hot tubbing.

Comfort Based Design

Designing a spa for Pure Comfort® is about more than just making you feel good. It's about helping you relax completely, putting you in a place where you can leave stress behind and recharge from ground zero. Stress can negatively affect your immune system, your social interactions and your health in general. The ability to fully let go, to completely power down, is so vitally important to your overall well-being. So, yes, we take comfort very seriously.

It's in the seat

Our designers have created ergonomically sculpted seats that comfortably cradle you, decompress your spine and keep you aligned. Combined with the buoyancy of the water, the seat's design releases pressure off parts of the body that are under force all day.

Our seats are also designed in a way that help keep the water's buoyancy from floating you out of the seat. After all, it's hard to relax when you're fighting the water to stay in place. There's also a Foot Ridge® unique to Caldera® spas that helps keep you stable in your seat even when the jets are at their highest setting.

Personalize your massage

Easily direct or increase water flow to the seats you choose with the diverter valves located around the Utopia® and Paradise™ Series spas. Adjust the strength and flow of many individual jets to your preference by simply turning the air valves or outer ring around individual jets.

The jets

Feeling is believing. When shopping for hot tubs, you can easily be tricked by a spa that's filled with dozens of shiny chrome jets. But what's the function of each? Is the water flow through each one based on its benefit to a specific area of your body? Are the pumps powerful enough to deliver a deep massage when needed and adjustable enough to deliver a gentle relaxing touch when that's what you want?

A Caldera spa is carefully and purposely designed with a variety of jet types, strategically placed to deliver just the right type of massage right where it's needed, whether it's your aching lower back or the soles of your feet.

Designed for Total Body Restoration

When you work in a gym with a personal trainer, he or she will create a plan that moves you from station to station with different exercises to give you a balanced, full-body workout that emphasizes all major muscle groups.

At Caldera® Spas, we've applied that same approach to massage. By configuring the jets in many Caldera models, we make sure you get the same holistic, whole-body treatment.

How does Hot Tub Circuit Therapy® work?

Each seat or position in a Caldera spa provides a deep massage to a different muscle group. As you move from seat to seat, jets focus on those groups, one at a time, including your neck and shoulders, the large muscles of your back, lower back, hamstrings, calves and feet.

Rotate through the circuit for total-body restoration or just concentrate on the areas that need the most attention. A Caldera spa is yours to personalize as you see fit.

1 UltraMassage®
Seat or lounge (varies by model) for neck, shoulder and middle back massage.

2 Atlas Neck Massage®
A contoured pillow cradles your head while specialized, above-the-water-line jets focus on neck and shoulders.

3 EcstaSeat®
Multiple jets focus on large muscles in your back. Select models work on wrists and calves.

4 LumbarSage® Seat
A unique jet configuration relieves tension and pain in your back's lumbar region.

5 Euphoria® Jets
These jets provide a deep, penetrating massage to thighs, knees, calves and feet (Two in most Utopia® models).

6 Hip Jets
In Niagara®, Geneva® and Cantabria® these jets work an often overlooked stress point and enhance movement there.

7 Angled Calf Jets
In Utopia models, they work on muscles in the lower leg.

8 Sole Soothers®
Jets stimulate and revive the muscles in your feet that bear your full weight all day.

9 Foot Ridge®
Anchors and holds you in place while powerful jets work on sore muscles.

Better by Design

Your Caldera wellness spa offers elegant, contemporary appeal that will enhance your living space and blend with its surroundings. It will bring life to the place you use for daily recovery. With enhancements that complement your spa's comfort and performance, our designers focus on creating a warm, inviting space that draws you in to relax. With color and cabinet choices, accessories, lighting and entertainment options, we help you create the spa that's uniquely you, and specifically for you. The result is a beautiful enhancement that transforms your living space as it transforms your life.

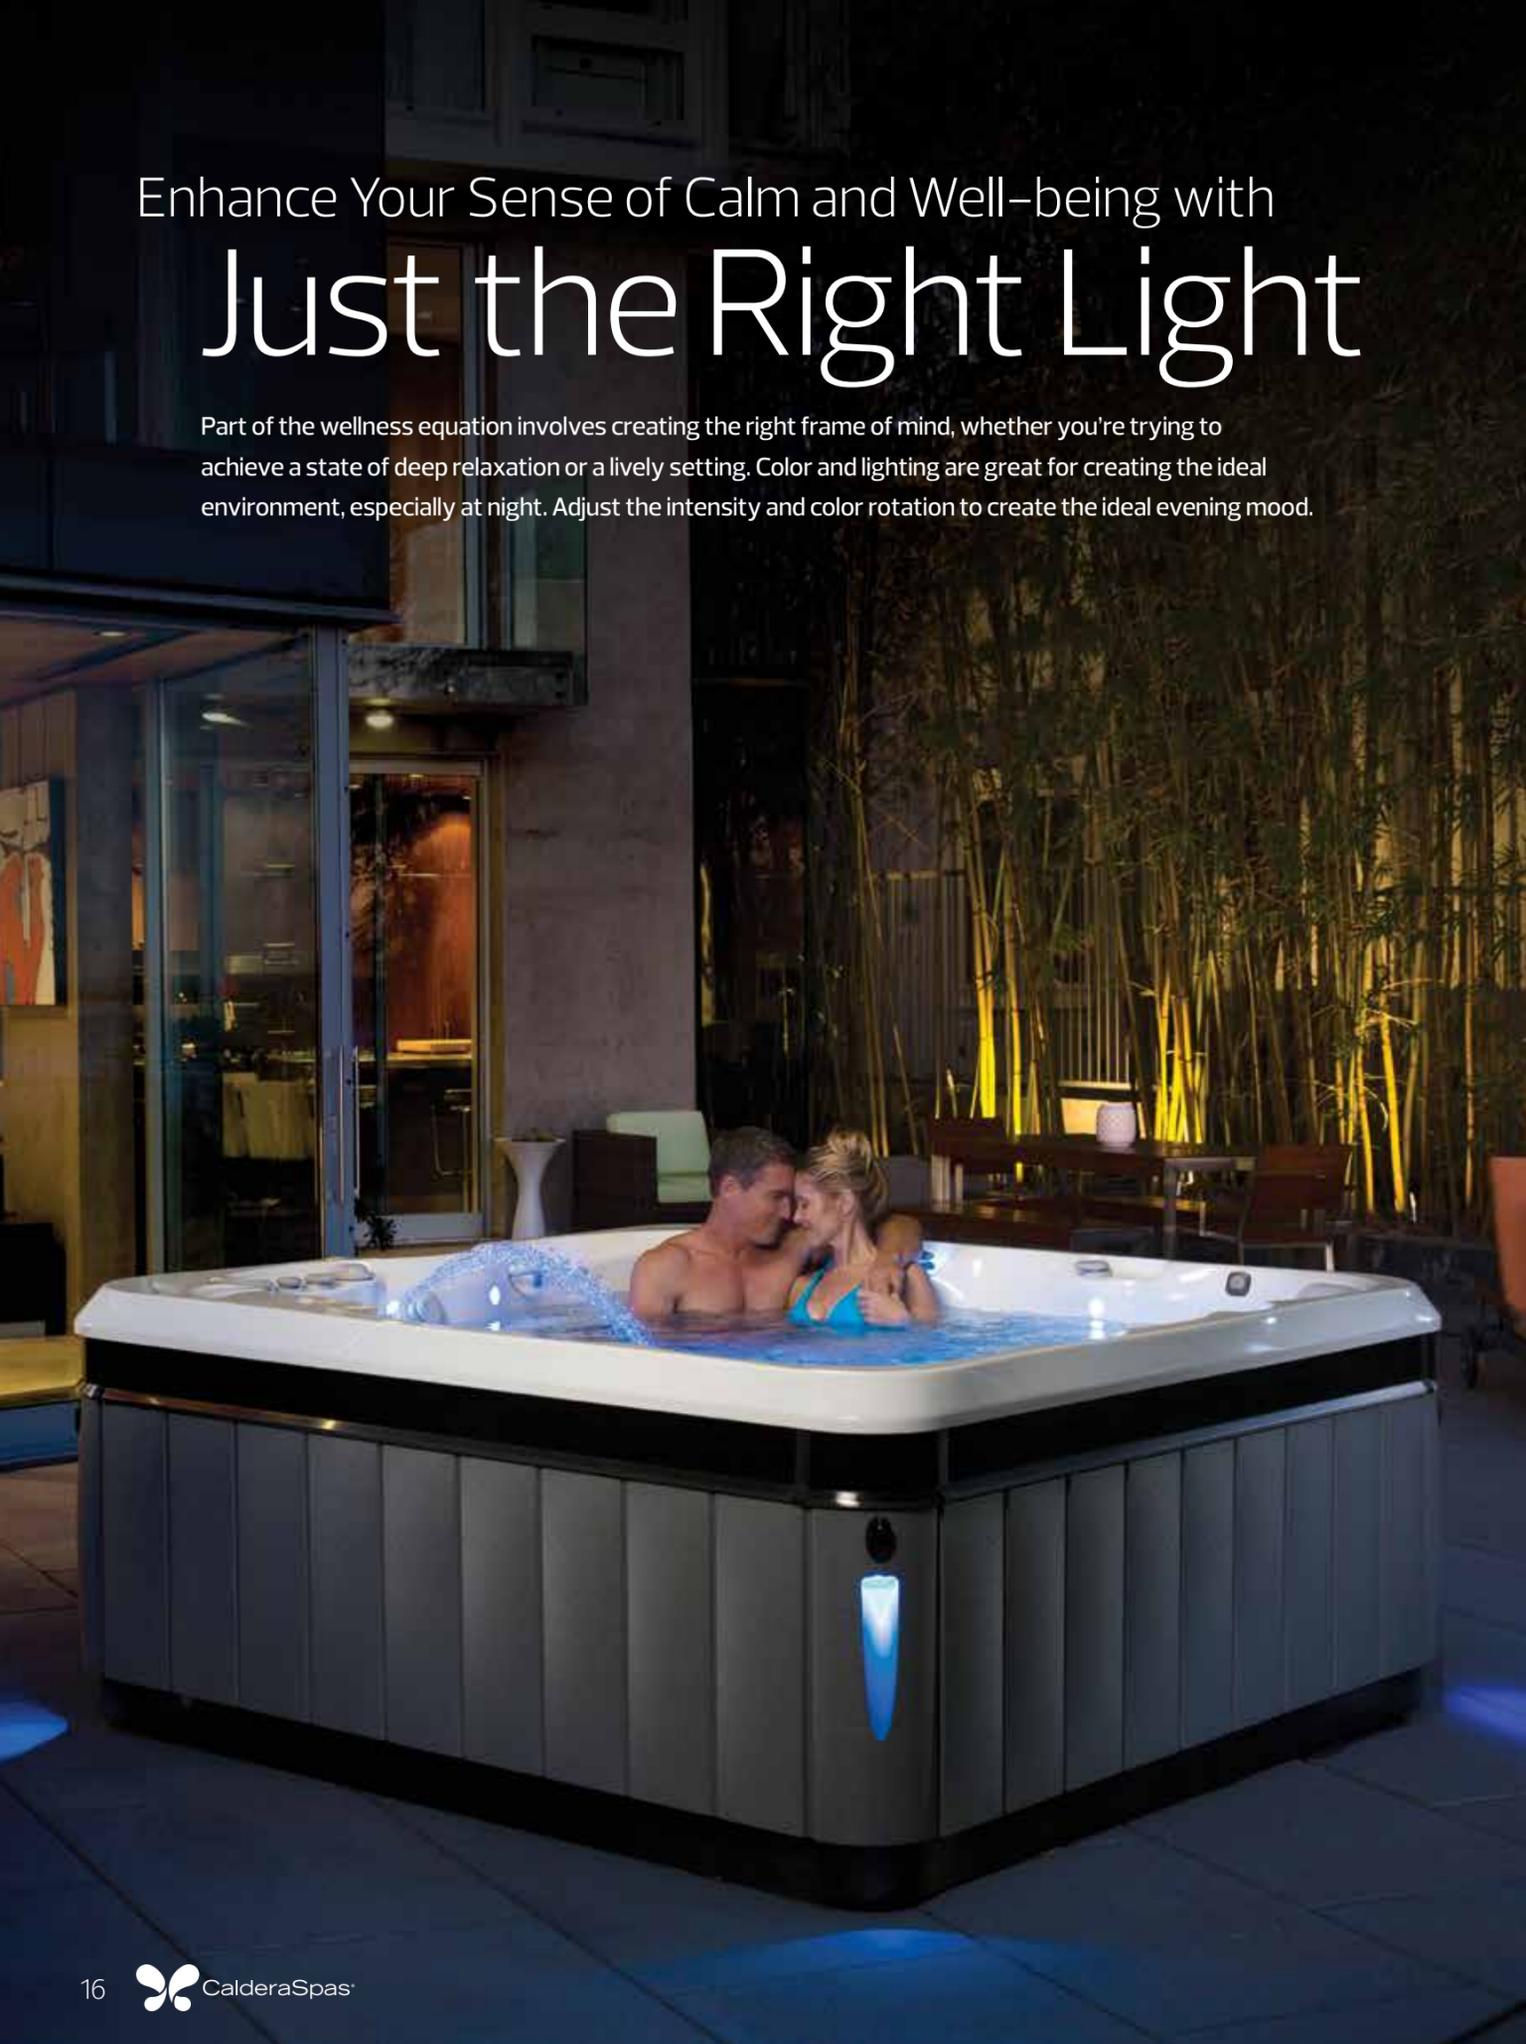

See the new comfort, design and performance features of our transformed Utopia® Series. Pages 26-33.

Enhance Your Sense of Calm and Well-being with Just the Right Light

Part of the wellness equation involves creating the right frame of mind, whether you're trying to achieve a state of deep relaxation or a lively setting. Color and lighting are great for creating the ideal environment, especially at night. Adjust the intensity and color rotation to create the ideal evening mood.

LED Points of Light System *Paradise® and Vacanza® Series*

The Caldera Points of Light System casts a reflective glow throughout the footwell, interior and water edge of your spa. Set it to reveal the color of your choice or to reveal a slowly rotating display of all six colors.

SpaGlo® Multi-Zone LED Lighting with Pin-Point Lighting *Utopia® Series*

The SpaGlo system in our Utopia Series models includes six colors that accent individual zones throughout the spa. All the zone lighting is adjustable. We've enhanced the system with pin-point lighting that highlights selected areas of the spa, including the Euphoria® jets

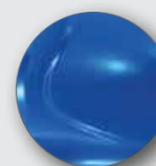

in the footwell of the Geneva®, Niagara® and Tahitian® models.

In addition to their interior lighting, the Utopia Series models feature corner and perimeter lighting that intensifies the beauty of the area immediately surrounding your spa.

Did you know yellow is the color of optimism? For insights about how color may influence mood, check out our blog.

Performance by Design

We believe that performance-based design involves both the materials used to construct our spas and the efficiency, power and durability of the components that run them.

We choose and design materials for our spas based on their ability to stand up to daily use. Whether it's the reinforced acrylic interior surface, the cabinet options or insulation, starting with the best base materials ensures peak performance throughout the life of your spa.

Healthy, clean water made easy

All water care systems require some attention and involvement, but some are far easier than others. With Caldera®, you have access to clean, healthy water without handling chemicals. With infrequent replacement of bromine and mineral cartridges, you can enjoy sparkling water whenever you're ready for a soak.

Energy efficiency

We're committed to energy-efficient design as a way to save energy and save you money on operating costs. From our innovative FiberCor® cabinet insulation to our highly efficient EnergyPro® system to custom-fit covers, a Caldera spa meets the most stringent energy efficiency standards established for portable spas. And that saves you money.

Advent control panel
(Utopia® and Paradise® Series)

Auxiliary control panel
(Utopia Series)

One-touch controls

The Advent® panel gives you intuitive control of spa functions right at your fingertips. An auxiliary control on Utopia Series spas lets you operate the spa from a second location from within the spa.

More power when it's needed

Sometimes, you want to feel a gentle flow of water. But when you need a deep massage and the wellness benefits it offers, a Caldera Spas pump is designed to provide it. We make sure it's easy for you to customize your massage so that it works specifically for you.

Innovative, high-quality components

Heaters, pumps and other components are designed so they're more efficient, robust and longer-lasting.

A loss in water weight can negatively affect athletic performance, cause fatigue, and impact your ability to think clearly. Staying hydrated helps you manage weight, lowers risk of heart attack, moisturizes your skin and increases its elasticity, and lubricates joints.

Source: Livestrong.org

With Caldera®, it's Easy to Keep Spa Water Fresh and Healthy

One of the greatest concerns first-time hot tub shoppers have relates to water treatment. Is it difficult, and will I always have clean water as part of my wellness effort?

Relax, because it's easy to keep the water in your Caldera Spas hot tub sanitized, clear, healthy and ready to use any time.

The Integrated FROG® Water Care System

Standard on Caldera spa models, the FROG system is bromine—and mineral-based, and is formulated to work effectively in warm water. The system is integrated into the shell of the spa where it works continuously.

How does it work?

Rather than measuring out chemicals, you simply replace color-coded cartridges that last for weeks or months. The cartridges have a dial that you adjust depending on how often you use your spa.

Mineral enhanced

The mineral cartridge enhances the effectiveness of the bromine, which allows you to use fewer chemicals.

Bromine is easier on the skin and the FROG system requires fewer chemicals, making it easy to use your spa as often as you want.

The Monarch® Water Care System

An alternative to the FROG system, the optional Monarch water care system (standard on Utopia® models) contains a CD—ozone unit that continually injects ozone bubbles in to the water to neutralize contaminants. Easy-to-replace silver-ion cartridges that last for four months work with the system to oxidize the water. Simply treat the water with MPS oxidizer after each use and add chlorine weekly.

It's an easy water care system that allows you to use a minimal amount of chlorine, yet enjoy sparkling spa water any time.

Right from the start

The Clean Screen® pre-filter attaches to your garden hose and ensures that you're filling your spa with the cleanest water, right from the start.

Softer water

The Vanishing Act calcium remover reduces calcium buildup for softer-feeling water that's better for you and your spa. It's a great solution for those in areas with hard water.

Energy-efficient Caldera® Innovations Save You Money Every Day

Better for the Environment

Why put so much effort and engineering into making a hot tub so highly energy-efficient? Because it's the right thing to do. It's better for the planet and it's better for your budget.

When it comes to a hot tub, "energy efficiency" translates directly to lower operating costs. In fact, saving money on a model that's not energy efficient could wind up costing you much more over the life of the spa.

That's why we've committed our design and engineering resources to making Caldera Spas one of the most energy-efficient hot tubs available. Just like the wellness benefits you get from our hot tubs, the savings you get from choosing Caldera will add up every day.

EnergyPro® technology

The innovative EnergyPro system in our Utopia® and Paradise® Series models keeps water hot and always ready for use while meeting the most stringent energy standards established by the California Energy Commission for portable spas. The EnergyPro circulation pump operates continually at very low wattage to filter water. Heater use is reduced, because 80 percent of the energy used to operate the pump is transferred back to the water as heat.

Custom high-density covers

We custom-build our covers to the exact measurements of our spas to ensure a tight seal between the bar top and cover for optimum energy efficiency. The full-foam cover is wrapped in durable, marine-grade vinyl and includes child safety locks. All our covers are UL listed in compliance with ASTM standards.

FiberCor® An innovation in hot tub energy efficiency

Caldera spas are insulated with proprietary FiberCor® insulation that has four times the density of the urethane foam used in most hot tubs. This industry breakthrough insulation is completely recyclable, 100% non-petroleum based and is free of harmful emissions. As a result, FiberCor provides superior insulation, improves hot tub performance, lowers energy costs, and is better for the environment.

Discover Your Perfect Fit

Everyone has their own vision of what owning a hot tub will be like. So we know your perfect Caldera® spa "fit" is as individual as you. Whatever your needs and preferences, let us help you discover the spa that will help create your perfect "Caldera moments".

What's the Best Way to Discover the Right Spa?

Owning and maintaining a Caldera® spa is easy—and our expert Caldera retailers make buying and owning a hot tub even easier. Knowledgeable, caring and helpful, your local retailer will listen and answer every question. Schedule a free test soak and discover the fit that's right for you.

Caldera quality

Each Caldera spa series offers models with a distinct level of value and features. And all Caldera spas are designed with our signature combination of Pure Comfort®, design, and performance to deliver optimal self-care and daily renewal.

Hallmark features:

- Beautiful interior acrylic shell, hand-crafted with our three-layer DuraBond system for strength
- Superior strength and design appeal of the Avante™ all-climate cabinetry on Utopia® Series models
- Durable, low-maintenance EcoTech™ cabinets on Paradise® and Vacanza® Series spas with the aesthetic appeal of natural wood
- Quiet and energy-efficient EnergyPro® system to minimize operating costs
- Energy-efficient and environmentally responsible proprietary FiberCor® insulation
- Integrated, low-maintenance FROG® in-line water care system

Utopia® Series

For the most ideal personal care experience, Caldera presents the Utopia Series featuring an exclusive combination of high-performance details and transformational design. Utopia Series models offer the pinnacle of hot tub comfort, design, and performance. Ease of use, low operating costs, and an exceptional hot tub experience make Utopia Series the preferred choice of discerning spa owners.

Paradise® Series

The high-quality Paradise Series models offer a blend of mid-range premium options and functions for complete restorative relaxation.

Vacanza® Series

The Vacanza Series models combine many signature Caldera comfort and quality features, delivering daily renewal at a great value.

THE UTOPIA® SERIES

Transformation by Design

The immediate allure and beauty of the Utopia® Series comes from its Avante™ all-weather cabinetry. Avante is an amazing long-strand fiber technology that is so durable it resists fading, and is warranted not to crack, split, or chip. It's a gleaming, high-strength material that gives the spa its contemporary look and fluid impression.

The transformed Utopia design features a new vision of the spa shell design, one that's minimal, elegant, and contemporary. Its curved lines add to the spa's beauty with an uplifting impression.

Bar top has crisp lines with large flat surfaces and more room to set a drink.

The filter grate design hides the compartment and reduces noise.

Durable and innovative Avante™ cabinetry is available in three earth mineral hues.

Dimensional stainless steel trim and black spacer highlight the spa's appeal.

The new ABS base pan beautifully frames the bottom of the spa and minimizes ground contact to protect components, improve energy efficiency, and add support.

Integrated cabinet lighting brightens all four corners and the surrounding area. The lighting can be set to automatically come on at the same time every evening.

A functional diagnostic logo light shows that the spa is working at the proper temperature and whether it needs servicing.

Design Innovation

The Utopia® Series spas represent our most innovative approach to design, performance, and comfort with features that are simply unlike any other spa available today. With its stunning multi-dimensional Avante™ all-climate cabinet and elegant new shell design, the Utopia Series will captivate you.

Two Euphoria® jets in the footwell (Niagara, Geneva and Tahitian models) can work independently or simultaneously to deliver the ultimate foot massage.

Utopia® Series Spas: All You Need to Fully Relax

Comfort is essential to wellness. It's what allows you to begin releasing tension and stress, both mentally and physically. The enhanced design of the Utopia Series allows you to sit comfortably while new jet configurations focus on the body regions that need it most, including your back, hips, thighs, calves and feet. It's an experience that will help you fully power down and recharge.

Comfort enhancements include:

- The Niagara® features his and her EcstaSeats® with multiple jets that focus on the large muscles of your back.
- Hip jets in the Niagara, Geneva® and Cantabria® work an important part of the body often overlooked in other spas.
- Angled calf jets in the corner seats work muscles in the lower leg.
- Deep foot ridges in the lounge seat provide area for you to anchor your feet as you enjoy a head-to-toe massage.

Better Performance with Enhanced Control

The performance features of the Utopia Series are remarkable for their power and efficiency, offering you full control of your spa functions. You're able to customize your spa experience with an intuitive new control panel and adjustable jets for a massage that's uniquely tailored to you. With four fully updated Utopia models to choose from, you'll find the one that's just right for you and your family.

Advent® LCD Control Panel gives more intuitive control of jets, lighting and entertainment options.

Durable and innovative Avante™ cabinetry is available in three earth mineral hues.

UTOPIA SERIES®
CANTABRIA®

The spacious Cantabria®, our signature hot tub, redefines hydrotherapy. It comfortably fits eight adults and features the UltraMassage® lounge with the customizable UltraMasseuse® System. This jetting system will make you feel like royalty as you create your personal spa experience with six different jet sequences and three speeds.

“After two full years of use on an almost nightly basis, I still love it and have not had a single service issue or problem. It is worth every penny.”

— Tahitian Owner, CT

THE PARADISE® SERIES

Versatile Spas Designed with Your Well-being in Mind

Our Paradise® Series is known for its versatility, premium range of options, and robust performance. In addition to its energy-efficient EnergyPro® system, its design enhancements include an upgraded intuitive control panel, new jet face design, and contemporary interior and exterior color options. The series includes four models, sized for three to seven adults.

Performance features

Like all Caldera® spas, the Paradise models feature performance innovations such as our exclusive energy-efficient FiberCor® insulation and the integrated FROG® in-line water care system.

All Paradise Series spas feature a DuraBond reinforced shell and a durable, low-maintenance EcoTech® cabinet.

The LCD Paradise Control Panel is more intuitive to use than ever before, giving you simple control of jets, lighting, and the integrated wireless sound system (optional).

Paradise Series control panel

Comfort and style features

Each Paradise model includes massage jets specially configured for Hot Tub Circuit Therapy® to maximize relief of tired muscles. Favorites include the cornerstone EcstaSeat®, a powerful Euphoria® jet, and the stimulating Sole Soothers® foot jets (vary by model). Conveniently placed diverters allow you to adjust and direct jet pressure to the seats of your choice.

Subtle style details throughout each Paradise model create a special ambiance, including the illuminated Acquarella® waterfall (featured in photo above), handrail, and flush-mount speakers on entertainment-ready spas.

THE VACANZA® SERIES

The Wellness Benefits of a Caldera Spa at a Great Value

The Vacanza® Series gives you access to the wellness and renewal benefits of a hot tub at a great value. Like all our hot tubs, Vacanza models include hydrotherapy jets that target major muscle groups to work away stress so you emerge fully rejuvenated.

These streamlined spas are ergonomically designed to cradle your body and feature a uniquely textured Foot Ridge® that lets you stay securely in your seat, helping you relax, especially when enjoying powerful jets. The sight and sound of the Acquarella® waterfall delights the senses and offers a peaceful meditative background.

All Vacanza Series spas are crafted for durability so you can enjoy them every day. Its features include:

- Jets configured for Hot Tub Circuit Therapy®
- Integrated FROG® in-line water care
- Energy-efficient FiberCor® insulation
- Durable, low-maintenance EcoTech™ cabinet
- 115v/20 amp plug-in (Tarino™ and Aventine® models)

Burn more calories in the same amount of time! A 2006 study in the British Journal of Sports Medicine showed that walkers in their fifties burned 25% more calories when they increased their walking speed a mere half mile per hour from 3.6 mph to 4.1 mph. But the caloric burn gets greater as speed increases. Add another half mile per hour from 4.1 to 4.6 and the effect burns 32 percent more calories.

Design Palette

Colors that Blend with Your Life & Your Surroundings

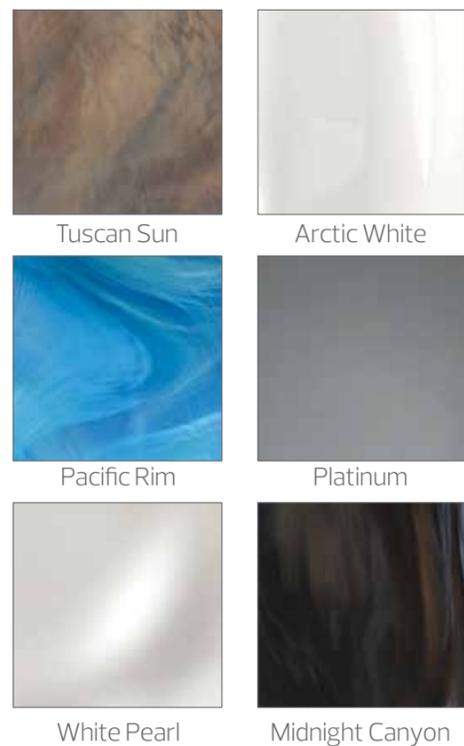

Choose the color of your new spa's hand-crafted, three layered DuraBond shell, EcoTech™ or Avante™ cabinet, and cover to coordinate your spa with your house, patio, or whatever area you wish. We'll build your spa to the combination you choose.

- 1 Choose your shell color**
 Paradise® and Vacanza® Series spas are available in up to five contemporary colors, featuring either a smooth or textured finish. Selection varies by model.
- 2 Choose your cabinet color**
 Paradise and Vacanza Series spas have a low-maintenance, durable EcoTech spa cabinet that combines the look of real wood with reinforced polymers. EcoTech is backed by up to a three-year warranty.
- 3 Choose your cover color**
 Caldera® spa covers, with their integrated cover lifter bar, deliver safety and energy efficiency. Color-coordinated with the spa cabinets, our covers feature dense foam insulation wrapped in durable marine-grade vinyl, and include ASTM-compliant child-safety locks.

The Utopia® Series

As part of our Utopia Series design transformation, we've introduced our revolutionary new Avante™ Cabinet in three colors inspired by earth mineral hues. Shell colors vary by model.

COVER

The Essentials that Every Spa Needs

A cover lifter is an essential spa accessory that protects your spa, the cover, and your investment. Designed to allow one person to effortlessly fold the cover back and out of the way, a lifter makes it easy for you to be in your spa in seconds, enjoying all the benefits of a daily 20-minute soak.

Without a lifter, your cover could be damaged as you take it on and off. That damage can affect the cover's energy efficiency and wind up costing you money in

energy bills. And anecdotal evidence suggests you'll tend to use your hot tub much less if getting the cover off and on is difficult and time-consuming.

Designed to integrate seamlessly with Caldera® spas, we offer four ProLift® Cover Lifter options that protect your cover and are easy to use. Talk to your dealer to see which is right for your model of spa and your needs.

ProLift

The ProLift (*not available on Utopia® Series spas*) attaches to both cover and cabinet and has a built in safety lock. Requires 14" clearance.

ProLift II

The ProLift II uses a single pneumatic gas shock for smooth operation. Requires 24" clearance.

ProLift III

Our best lifter, the ProLift III has two pneumatic gas shocks to provide smooth, quiet operation. Very little effort is required to remove or replace the cover, even on larger spa models, because the shocks do the heavy lifting. Requires 24" clearance.

ProLift IV

For decks, gazebos, or other areas where clearance is limited, the ProLift IV enables you to position the cover vertically, just behind the spa. Requires only 7" clearance.

Spa side umbrella

Protect yourself from direct sunlight or rain with our large 9'9" diameter umbrella. The canopy pivots to cover the spa or your patio. The base slips securely under the spa cabinet for stability. Canopy available in Crème or Navy.

Spa side handrail

Our handrail is ideal for children, seniors or anyone who wants to feel more secure getting in or out of their spa. The baseplate slips securely under the spa cabinet for stability, and the curved rail pivots for entrance or exit. For added safety, the handrail is illuminated with an LED light.

Spa side towel tree

Hang towels or robes while you take a rejuvenating soak. Made with weather-resistant, powder-coated aluminum.

Avante™ steps

These two-tiered steps match the Avante all-weather cabinet on our Utopia® models. Available in Slate, Sand and Brownstone.

EcoTech™ steps

Our durable EcoTech steps are made from the same weather-resistant material used to construct our exterior cabinets. Available in Coastal Gray, Espresso and Teak.

Polymer steps

This economical 32" step is durable, lightweight and made of recycled materials. Available in Coastal Gray, Espresso and Teak.

Looking for natural methods for reducing inflammation? Natural anti-inflammatories with impressive results include black cherry juice, turmeric, and even cinnamon. A simple online search provides details. As always, check with your doctor before adopting any supplemental health plan.

Nothing Enhances Your Relaxation Like High-quality Sound

Add music to any Caldera spa

Music has the ability to enhance or create nearly any mood. For the ideal setting in or around a hot tub, it's important to have components designed to deliver high fidelity sound in a wet, outdoor environment. We offer a range of integrated music options so that you can find the entertainment system that works best for you.

If you love to relax to music, be sure to order your Caldera® Spas hot tub with integrated speakers that are factory-installed and thoughtfully placed within the spa shell for superior sound quality. Upgrade your system with an internally mounted subwoofer to enhance the low-range bass and volume. Every Caldera Spas Wireless Sound System lets you adjust volume, bass, treble and balance from controls on the spa.

Bluetooth®

Wireless sound system with Bluetooth®

Our Bluetooth music options heighten your spa enjoyment and help you unwind as you relax or enjoy a massage for your tired muscles. Stream music live or play from your own music library.

CALDERA WELLNESS

To relax, try the 4-7-8 Relaxing Breath Exercise. Press your tongue to the roof of your mouth with the tip of your tongue near the base of your front teeth. Breathe in through your nose slowly to a count of 4. Hold your breath for a count of 7. Exhale through your mouth for a slow count of 8. As you exhale with your tongue pressed against the roof of your mouth, make a soft "wooshing" sound. Keep the tip of your tongue in the same position throughout. Repeat the cycle four times. This twice-a-day exercise is a "natural tranquilizer" for the nervous system.

Source: Dr. Andrew Weil, M.D.

Series Speakers

Utopia® Series

Music-ready Utopia models include low-profile integrated speakers that surround the contoured pillow headrests for high quality sound.

Paradise® Series

Music-ready Paradise models include sleek speakers thoughtfully placed on the spa shell.

Vacanza® Series

Most Vacanza models can be ordered music-ready to include integrated speakers.

Monitor and Control Your Spa from Anywhere in the World

With the Connexion® Remote Spa Monitoring System, you and your local dealer can monitor the status of your hot tub from nearly anywhere in the world using a smartphone or tablet.

The system provides real-time information and control of spa functions. With VirtualValet™ and a subscription service, your local dealer can receive alerts from the system and respond when issues arise.

The Connexion subscription service makes it much easier to maintain your spa when you're away. It's especially helpful for a spa at a vacation home or cabin, or to help frequent travelers monitor a spa from anywhere.

Connexion offers more than just information and real-time alerts if there's a problem. It also allows you to control select spa functions remotely.

Best of all, Connexion gives you the peace of mind that your spa is working properly and will be serviced when needed. The Connexion Remote Spa Monitoring System is available as a dealer-installed option on all Caldera® spa models.

Get More Use from Your Hot Tub During Hot Summer Months

While many hot tub users prefer to keep their spa water hot year round, some people want to cool down in their spa during summer. Now Caldera® Spas offers a way to cool down and get more use from your hot tub during those months. With the CoolZone™ Hot Tub Cooling System, your Caldera Spas hot tub can both cool and warm spa water, something not possible with most hot tubs. It works much like an air conditioner, cooling spa water to as low as 60 degrees. When you're ready to warm the water again, the system works in conjunction with your heater to efficiently raise water temperature in just a few hours.

Energy-efficient

The CoolZone system is highly efficient and can improve the energy use of your hot tub during normal operation because it can reduce the amount of time the heater needs to run. Over time, it can reduce your operating costs and save you money.

Therapeutic benefits

A cold soak can help muscle recovery by reducing swelling caused during a strenuous workout. When you leave the water, muscles warm up, bringing oxygenated blood back in to help muscles recover. Later, the CoolZone system can raise the spa water temperature to provide the benefits of warm water immersion, bringing more oxygenated blood to tissues, and increasing flexibility.

CoolZone must be installed by your dealer in conjunction with a licensed HVAC installer.

Family benefits

A hot tub can enhance communication within a family with more time together, free of distractions. By creating a cool getaway during a hot summer day, your Caldera spa can become a great place for a family to gather, cool off, and relax.

The Best, Most Comprehensive Warranties, Because Peace of Mind is an Important Part of the Wellness Equation

On the journey to a holistic state of well-being, it's important to minimize stress and worry. Take control of what you can and let the rest go.

If you're buying a hot tub to enhance your peace of mind and your overall wellness, you certainly don't want to worry about whether that hot tub will work according to your expectations or what you'll do if it doesn't.

A Caldera® Spas hot tub delivers the peace of mind that only comes when you know that your investment is protected by the most complete warranty in the hot tub industry.

How do we do it? Simple. If you make the best hot tub with the most dependable, high-performance components, offering the best warranty is just the logical next step. From precision craftsmanship to rigorous quality control and testing, each Caldera spa is scrutinized for form, function, fit, and finish.

Utopia® and Paradise® Series

- 10-Year No-Leak Shell Warranty
- 7-Year Shell Surface Warranty
- 5-Year Avante™ Cabinet Warranty
- 5-Year EcoTech™ Cabinet Warranty
- 5-Year No-Leak Plumbing Warranty
- 5-Year Component Warranty
- 5-Year EnergyPro Heater Warranty

Vacanza® Series

- 5-Year, No-Leak Shell Warranty
- 2-Year Shell Surface Warranty
- 2-Year No-Leak Plumbing Warranty
- 2-Year Component Warranty

A legacy of trust

Caldera® Spas was founded in 1976 and is one of the most heralded and trusted spa brands in the world. Caldera is manufactured by Watkins Wellness—the global industry leader having built more than one million hot tubs.

Quality assurance

From precision craftsmanship to rigorous quality control and testing, each Caldera spa is scrutinized for form, function, fit, and finish before it is ready for you. We are committed to the highest level of engineering and construction and back each spa with our exceptional ComfortGuard® limited warranty—one of the best in the industry.

Recognition

Caldera spas are recognized throughout the industry for performance, quality, and customer satisfaction. Recent awards and recognition include being consecutively named a Consumers Digest® "Best Buy" for the Paradise® Series Martinique® model and receiving nine consecutive certifications for excellence in customer satisfaction from the consumer group SpaSearch.

At your service

Backed by the full expertise and resources of Caldera Spas, our

professional retailers are committed to ensuring your long-term customer satisfaction. From purchase to installation to service and more, count on your professional retailer to make Caldera ownership easy and enjoyable.
